Plymouth School Committee

C/O Tricia Liskov

11 Lincoln Street

Plymouth, MA 02360

Dear members of the Plymouth School Committee,

I would like to express my interest in the current open position in the Plymouth School Committee. As a resident of Plymouth for over 20 years, I want to giveback to this great community. I cannot necessarily contribute financially to our community, but I want to give something I feel is more important, time and the desire to make a difference. I have 4, soon to be 5 children in the Plymouth public school system and want to be involved in shaping their educational experience as well as help with shaping the future of education in our town.

With the rapidly changing landscape of societal topics and technology, it is important to actively work with our educators, parents, and town leadership to ensure every child gets the best experience in the school system. I would love to collaborate as a team to bring the community together to make a strong school system. A good school system can be the difference in people's decision to move to Plymouth. My wife has been a member of the West Elementary School PTA for years and is the current President and has shown me that how someone can make a difference. Her hard work and dedication has paid off for the community of WES. and motivated me to apply for this position.

This will both be a challenge and a learning experience for me as I have never been involved in anything at the town level, but I am highly motivated and very interested in learning more about the way our community works together for the future. Thank you for your consideration for the open position on the committee, please do not hesitate to reach out with any questions.

Thank you for your time,

Jonathan Rand
